Job Description

Responsibilities:

- **Lead and mentor** a team of backend developers, fostering a collaborative and high-performing environment
- Provide **technical expertise and guidance to the team**, ensuring best practices in software development
- Oversee sprint **commitments** and ensure project milestones are met
- Participate **in software architecture design** and **ensure seamless integration** with monitoring and support tools
- Develop **new features and maintain existing modules**, ensuring scalability and performance
- Conduct code reviews, provide **constructive feedback**, and maintain high-quality technical documentation
- Ensure efficient and effective **testing methodologies within the team**
- Stay updated on emerging technologies and introduce relevant innovations
- Collaborate with product managers to **align development strategies with business goals**
- Motivate and support team members, set clear objectives, and facilitate professional growth

Requirements:

- Proven experience as a Team Leader in software development
- **5+ years of programming experience, particularly in PHP**
- Strong expertise in **Symfony** (version 5 or later)
- Deep understanding of **Object-Oriented Design, MVC implementation, and software architecture**
- Experience with service-oriented architecture and unit testing
- Familiarity with agile methodologies (Scrum, Kanban)
- Ability to collaborate with remote engineering teams
- Excellent **leadership, communication, and decision-making skills**
- Fluent in English

The company:

Join a thriving technology hub at the forefront of innovation, offering a dynamic and collaborative work environment. As an international company expanding rapidly, we provide exciting opportunities to work on cutting-edge projects in a multicultural and inclusive team.
