Job Description

Responsibilities

- **Data analysis:** you will actively research **ways to improve the clients knowledge** using the data points available from Airport AIs platform. You will **create new reporting tools** to make it easier to understand and visualise the data
- **AI training:** you will create and maintain **training and testing datasets** that are used to train and assess fine-tuned Large Language Models (LLMs). You will also work on prompt engineering to get the best results from LLMs used without fine-t

Requirements:

- You have an entrepreneurial mindset and hold **relevant data-related experience** from previous positions.
- You are a hardworking and very structured person.
- You have a **strong interest in Artificial Intelligence**.
- Good **Excel** skills, together with written and oral fluency in **English**, are required.
- Knowledge of **Portuguese, Spanish** and a general affinity for languages is preferred.

The company:

Airbot Technology Limited is the worlds leading **customer service platform for the airport industry**. We have developed a software-as-a-service platform **allowing airports to communicate efficiently** with passengers on their websites, mobile applications or 3rd-party messaging applications. We are currently working with more than 80 airports around the world, including Frankfurt, London Gatwick, Lisbon and Sydney airports.
