Salary : To be defined

Gender : Any

Career Level : Mid Level

Qualification :

Job Description

Responsibilities:

- Working within a global team of financial engineers;
- the candidate will focus on the development of the Quantitative Investment Strategies (QIS) platform and help ensure its smooth running.
- Implementation of new types of QIS within the platform; with a freedom to develop within an established code base (Python, Net)
- Creation of new indices within existing QIS types.
- Automation of well established processes (both long and short term projects to improve the efficiency and robustness of the platform)
- QIS linked structured product pricing
- Preparation of narrative/marketing materials to support new product ideas including generation of quantitative statistics/ QIS backtests

Requirements:

- Strong competency in python programming (heavy focus on time series analysis)
- Good spoken and written English
- Knowledge of financial markets with a basic understanding of financial derivatives.
- Flexibility in approach: to deal with day-to-day business needs and long term projects at the same time.

About the company:

Fintech company with a leading marketplace for structured investment solutions.
