Job Description

Responsibilities:

- Maintain and enhance existing **Vue.js-based web applications**.
- Collaborate closely with backend developers, designers, and product managers to implement new features and improve user experience.
- **Write clean**, maintainable, and testable frontend code using modern **TypeScript practices**.
- Integrate with **APIs and backend services** (REST, GraphQL, etc.).
- Participate in code reviews, daily stand-ups, and sprint planning sessions.
- Stay current with **modern frontend development trends and best practices**.

Requirements:

- Minimum of **3 years of hands-on experience developing and maintaining production web applications using Vue.js** (Vue 3 preferred).
- Solid understanding of JavaScript, TypeScript, HTML5, and CSS3/SASS.
- Familiarity with **state management libraries** (e.g., Pinia, Vuex).
- Experience **working in enterprise environments**, preferably with complex domain logic (finance, healthcare, etc.). Comfortable using Git, CI/CD tools, and task runners (e.g., Webpack, Vite).
- **Proven ability to collaborate in cross-functional teams** and deliver high-quality code.
- **Fluent in English** (written and spoken).

Nice to have:

- Experience with **Vue 2, React, or Angular**.
- Understanding of **UX/UI principles and responsive design**.
- Familiarity with Jest, Cypress, or other testing frameworks.
- Knowledge of **Agile/Scrum practices**.
