Job Description

Responsibilities:

- Collaborate with the development team to design, develop, and implement features using **React, NodeJS and Postgres**.
- Write clean, efficient, and maintainable code while adhering to best practices.
- **Troubleshoot, debug, and upgrade** existing systems as necessary.
- Participate in code reviews and provide constructive feedback to peers.
- Contribute to the **technical design and architecture** of new applications and enhancements.

Requirements:

- Strong proficiency in **React, NodeJS and Postgres**.
- Experience working in a **remote environment**, demonstrating excellent communication and collaboration skills.
- Proven track record of developing and deploying scalable web applications.
- Solid understanding of **software engineering** principles and the full software development lifecycle.
- Ability to work independently, manage time efficiently, and deliver high-quality results.

Preferred qualifications:

- Experience with **Scrum/Agile** development methodologies.
- Bachelor's degree in **Computer Science, Engineering**, or a **related field** (or equivalent work experience).

The company:

Terah is a practical, safe, and free healthcare application designed to help address one of the main issues in the sector: the incorrect use of medication and poor adherence to treatment by patients.

It is a promising Portuguese startup, with an innovative solution in **healthcare system**, considered in 2024 as the top twenty startups to impact health system in the near future.

So, if you have a desire to leave a footprint in history, truly believe that you can make the change and set a new paradigm, you can't miss the opportunity.
