Job Description

No specific prior working experience is required. Temporary contract.

Responsibilities:

- **Perform** regression testing of website front-end applications with a strong focus on pricing
- **Prepare** new test plans
- **Expand** existing test plans
- **Be the central point** of coordination for the release signoff process working with different teams including development, release management, structuring and test automation teams

Requirements:

- Strong Mathematics/Physics or Engineering background (MSc)
- Desire to learn about Financial markets and Quality Assurance.
- **IT** affinity
- **Very good** knowledge of data crunching in **Excel**
- **Very good** command of the **English**

Nice to have:

- Knowledge of financial markets
- Knowledge of Financial instruments pricing
- Prior IT software intensive experience (coding, database querying)
- Any relevant testing, IT or financial certification

Type of profile:

As a Junior Quality Assurance Financial Engineer, you will have a unique and exciting opportunity to join a young and dynamic company, committed to delivering value added services in the investment product space.

You will be part of the Projects department, working very closely with the IT development and business analysis teams as well as our quality assurance experts

Thanks to a rapidly changing and growing organization, frequent communication with end-users and internal training on the investment products you will validate pricing use cases and other automated tests on our highly specialized Test Automation Framework (TAF) our gateway for IT software releases.

As part of the Test Automation and Test Management team, you will specifically contribute to rapid growth of the test automation coverage for existing applications, as well as new ones under development.

About the company:

Our client is fintech company with a leading marketplace for structured investment solutions.

Your recruiter:
