Job Description

End-of-studies internship

Requirements:

- Recent graduates in computer science or a related scientific field,
- Attributes such as diligence, autonomy, curiosity, commitment, teamwork, and a strong sense of service,
- Familiarity with IT systems, operating systems (Linux), architecture, and networks,
- An interest in working in the banking sector,
- English.

Context:

What is it?

A **6-month pre-employment internship**, providing theoretical and practical training in application support throughout the internship duration. The **Application Support Analyst** serves as a critical liaison between the Technical IT, Infrastructure, and Business Teams, ensuring seamless operation of all processes, IT systems, and daily business activities.

How does it work?

At the beginning of the internship, Alenia Consulting will provide you with **theoretical training in application support**. You will then be fully **immersed with one of our clients**, a major European player in the banking sector. Alenia will support you throughout the internship, ensuring proper integration and training. Our IT production experts will provide on-the-job training, exposing you to an exciting role bridging the gap between development, infrastructure, and business teams - **an excellent foundation for a successful career!**

About the company:

Alenia's story is about friendship and the dream of building something different. At the beginning, there were 3 friends who had known each other for over ten years. After a successful career within large corporations, they were ready to evolve. They felt a need for freedom, **a desire to serve their clients, and to offer clients and consultants a more agile and creative way of working based on collective intelligence.**

Through Alenia, **they wanted to offer consultants great career paths, but also a friendly environment where people take pleasure in doing their work.** Joining Alenia means providing excellent customer service, while having fun and exploring new ways of doing things.

At Alenia, we support our clients in the **modernization of their information systems through the integration of DevOps, software craftsmanship and new Agile organizations** that allow the creation of flexible high-quality products. We help them focus their energy on added value and create a positive and creative dynamic for the future. We guide them to success.
