Job Description

Responsibilities:

- Lead, mentor, and manage a team of **QA engineers** to ensure high-quality software delivery
- Design and implement an **internal QA automation framework**
- Develop and execute automated test scripts, identifying and reporting bugs
- Improve **CI integration and enhance testing processes**
- Work closely with Engineering and Product teams to define test plans and validate requirements
- Monitor and analyze **test results**, continuously improving test coverage
- Manage and maintain **QA test environments**, including test datasets and integrations (DB, Queues, APIs, etc.)
- Maintain **clear technical documentation** and build the QA Automation Roadmap

Requirements:

- Proven experience as a QA Automation Team Leader or Senior QA Engineer
- **5+ years of experience** in software quality assurance
- Strong proficiency in **JavaScript testing frameworks** (Jest preferred)
- Solid **understanding of OpenAPI specifications and Git** (GitHub preferred)
- Experience with Agile methodologies and test management tools (Qase.io, Jira preferred)
- Familiarity with **CI integration** (GitHub Actions preferred)
- **ISTQB certification** is a plus
- Strong attention to detail and problem-solving mindset
- Fluent in **English**

The company:

Join a thriving technology hub at the forefront of innovation, offering a dynamic and collaborative work environment. As an international company expanding rapidly, we provide exciting opportunities to work on cutting-edge projects in a multicultural and inclusive team.
