Job Description

Responsibilities:

- Collaborate with team members to **define objectives and develop functional, efficient code** that enhances the user experience
- Design and implement **RESTful APIs**, ensuring high performance and scalability
- Develop new features and optimize existing ones by staying up to date with industry trends
- Build reusable and maintainable code for future development
- Ensure **security best practices and data protection measures** are integrated into all solutions
- Work closely with developers, designers, and system administrators to identify and implement new features
- Stay ahead of emerging technologies to **continuously improve the development process**

Requirements:

- **4+ years of experience** in software development
- Strong programming skills in PHP (version 8 or later)
- Experience **debugging complex PHP applications** (Xdebug, Profiler, etc.)
- Familiarity with software development principles such as **SOLID, KISS, and ACID**
- Proficiency in **Symfony** (version 7 or later)
- Strong understanding of Object-Oriented Programming and Design Patterns
- Knowledge of **RabbitMQ, Docker, and ElasticSearch** is a plus
- Experience with microservices architecture and web services
- Familiarity with **AWS, GCP, and Kubernetes** is an advantage
- Knowledge of Go is a plus
- Proficient in **English**

The company:

Join a thriving technology hub at the forefront of innovation, offering a dynamic and collaborative work environment. As an international company expanding rapidly, we provide exciting opportunities to work on cutting-edge projects in a multicultural and inclusive team.
