Job Summary

Vacancy :
Deadline : Aug 29, 2025
Published : Jul 29, 2025
Employment Status : Full Time
Experience : Any
Salary : To be defined
Gender : Any
Career Level : Any
Qualification :

Responsibilities:
• Contribute to the design and development of a **Data Warehouse based on Oracle Database 19c Enterprise Edition**.
• Develop scalable, efficient, and maintainable **PL/SQL code** for data movement, transformation, and reporting.
• Implement **complex reporting solutions** in areas such as Risk, Finance, and Regulatory reporting.
• Collaborate with business users to understand requirements, workflows, and data needs.
• Refactor and enhance legacy systems to improve scalability, performance, and maintainability.
• Write clean, reliable code following company's best practices and development standards.
• **Optimize SQL and PL/SQL code**, leveraging **advanced Oracle features** like parallel queries, partitioning, compression, and analytical functions.
• Tune database/query performance using tools such as **ASH and Real-Time SQL Monitoring**.
• Support data modeling activities using techniques such as **Kimball, Data Vault, or 3NF**.
• Work in an agile, collaborative environment, contributing to design reviews and mentoring junior developers.

Requirements:
• **5+ years of experience** in Oracle SQL and PL/SQL development.
• Strong understanding of data modeling for **data warehouses, including dimensional modeling and normalization techniques**.
• Deep knowledge of advanced **SQL concepts**, including analytical functions, hierarchical queries, complex joins, partitioning, and parallel execution.
• Hands-on experience in performance tuning and troubleshooting using **Oracle diagnostic tools** (e.g., ASH, AWR).
• Strong problem-solving skills with the ability to develop **creative and scalable solutions**.
• **Proactive and independent working style** with high attention to detail.
• Fluency in **English** with excellent communication and collaboration skills.
• Experience in the financial or insurance industry is a strong advantage.
• Working knowledge of **Git version control systems** is a plus.
• Proficiency in **Python programming** language is a plus.
• Developing web-applications using **Oracle Application Express** considered a plus.
• Solution-driven mindset and interest in investment banking and derivative financial products.
