Deadline : Apr 17, 2025

Published : Mar 18, 2025

Employment Status : Full Time

Experience : 5 - 10 Years

Salary : To be defined

Gender : Any

Career Level : Top Level

Qualification :

Job Description

You will be part of the **IT Development department**, responsible for designing, implementing and maintaining key business applications and services on our highly-specialized investment product management platform. The company values Agility (through **SCRUM**), **Technology** (through a modern micro-services platform built with functional programming in Scala) and **Collaboration**.

You will provide concrete and robust technology solutions to our clients, partners and users.

As part of the Omega Software Engineering team you will specifically contribute to a key business unit managing the **processing, trading and hedging of long-maturity Life-Insurance Products** through a modern white-labelling IT platform.

Responsibilities:

- High quality solutions in tight timeframes to meet demanding customer requirements;
- Work closely with **business and other IT units** to gather and understand requirements;
- Contribute to **software and architectural design decisions**;
- Contribute to a **robust automated test suite** to work in a continuous integration / continuous deployment environment;
- Become involved in the internal **DevOps and Scala guilds**, building relationships with other developers and **identifying / implementing best practices**;
- Maintain close interaction with the business on very diverse topics: front-end portals to management of long-maturity life insurance products;

Requirements:

- Experience building scalable, distributed applications in **Scala and Java**;
- Strong **analytical skills**;
- Strong understanding of Algorithms and Data Structures;
- Experience in developing software in an **Agile environment**;
- Interest in the latest programming trends such as functional and reactive programming;
- Knowledge of **relational and non-relational database** systems;
- Experience in **implementation of APIs for integration** with internal and external systems;
- Strong problem solving skills & ability to learn in a fast paced environment;
- Fluency in **English**;

Nice to have

- **Financial background** in either banking or the insurance industry
- Cloud migration activities either Public or Private
- Experience of working with design thinking techniques in iterative sprints
- **CQRS and event sourcing** hands on experience
- Knowledge of **server-less architecture**
- DevOps experience configuration management, containers, virtualisation, continuous integration and deployment
- Practical experience with Google Cloud Platform
- Akka / Akka Persistence / Akka HTTP / Akka Streams
- Cats / FS2
- Slick
- Kafka / event streaming pipelines
- Docker
- Kubernetes
- AWS
- Jenkins
